

HardCap A1+

The new HardCap A1+® is another major innovation from JSP in head protection design. Designed to exceed the most recent standards, years of thought and design iterations have been undertaken to develop a product that is unrivalled in both performance and style. Sleek and low profile, it's almost impossible to distinguish from a standard 'high street' baseball cap. The unique angled adjuster designed to fit under the occipital bone at the rear of the skull means that one size really does fit all, particularly when combined with the castellated protective liner. The liner is removable, therefore the cap part is machine-washable for hygiene purposes. It has a terry-towelling sweatband for added comfort and all colour-ways have subtle reflective piping for added visibility safety.

1

Low profile Design

Ultra sleek low profile design means the HardCap A1+ is almost indistinguishable from a high street 'fashion' baseball cap.

2

Ventilation

Extra holes in the liner plus the two mesh panels on the outer mean added ventilation for coolness and comfort.

3

Removable Liner

The protective liner is removable, meaning the outer cap is fully washable for hygiene purposes and extended life cycle.

4

All Round Protection

The HardCap A1+ has been designed, like all JSP head protection, to offer 'all round protection' from all angles of the cap.

5

Reflective Piping

Reflective piping on all models adds extra visibility and therefore safety in all working environments.

6

Sweat Band

Terry towelling sweatband adds comfort and absorption for the wearer.

7

Unique Adjuster

Unique one-handed angled adjuster means the fitting can be adjusted quickly and safely with one hand, the angle to fit means it grips under the occipital bone on the skull and gives a true 'one size fits all' scope.
