

OPSIAL®

AIR'PRO P3 welding fumes filters

P702LWF

P3

17,5g

APPLICATION

Protection P3 against highly-toxic particles and toxic solid and/or liquid aerosols: welding fumes, dusts from chromium, cobalt, lead, cadmium, hardwoods (oak, beech), asbestos (low concentration), silica, granite, ceramic fibres, legionella (short duration).

BONUS

Compact, lightweight and comfortable.
Unique patented filter technology:
highly improved breathing.
Filters out **99.95 %** of dust
(mean diameter **0.3 microns**).

Main features

Materials:

- Filters: Mechanical type multi-layer HESPA Synthetic media with TPE flexible overmolded / encapsulated. Media impregnated with activated carbon.

Shelf life: 3 years

Description

- Replacement filters for AIR'PRO P3 welding fumes
- Exceptional breathing comfort:
 - Patented pleated encapsulation technology for a larger filtration surface area
 - The synthetic HESPA® material uses mechanical filtration, giving greater comfort than electrostatic filtration used in disposable masks
 - Large central exhalation valve, highly effective for evacuating CO2 and heat
- Filter service life: one week in extreme conditions
- Significant economies of scale and waste reduction compared with single-use masks
- Filtration superior to FFP3 disposable masks

Standards

- Filters in compliance with standard EN 143: 2000 + A1: 2006 P3 RD

Packaging

- Single pair bag
- Box of 5 pairs of filters
