Dura Light 2.3 is an exceptionally versatile handheld flashlight engineered for heavy-duty use in the industrial, rescue, and transportation sectors. It delivers a powerful 800-lumen light output, reaching up to 230 meters, with four adjustable modes to adapt to varying conditions. The Dura Light 2.3 features a 4400 mAh battery with a power bank function, allowing you to charge external devices. Its rugged IP67-rated construction provides excellent water and impact resistance, while the integrated safety hammer is designed for emergencies, such as breaking windows in critical scenarios.
